

Heat Mark

Temperature Indicating System for Heat Treatment

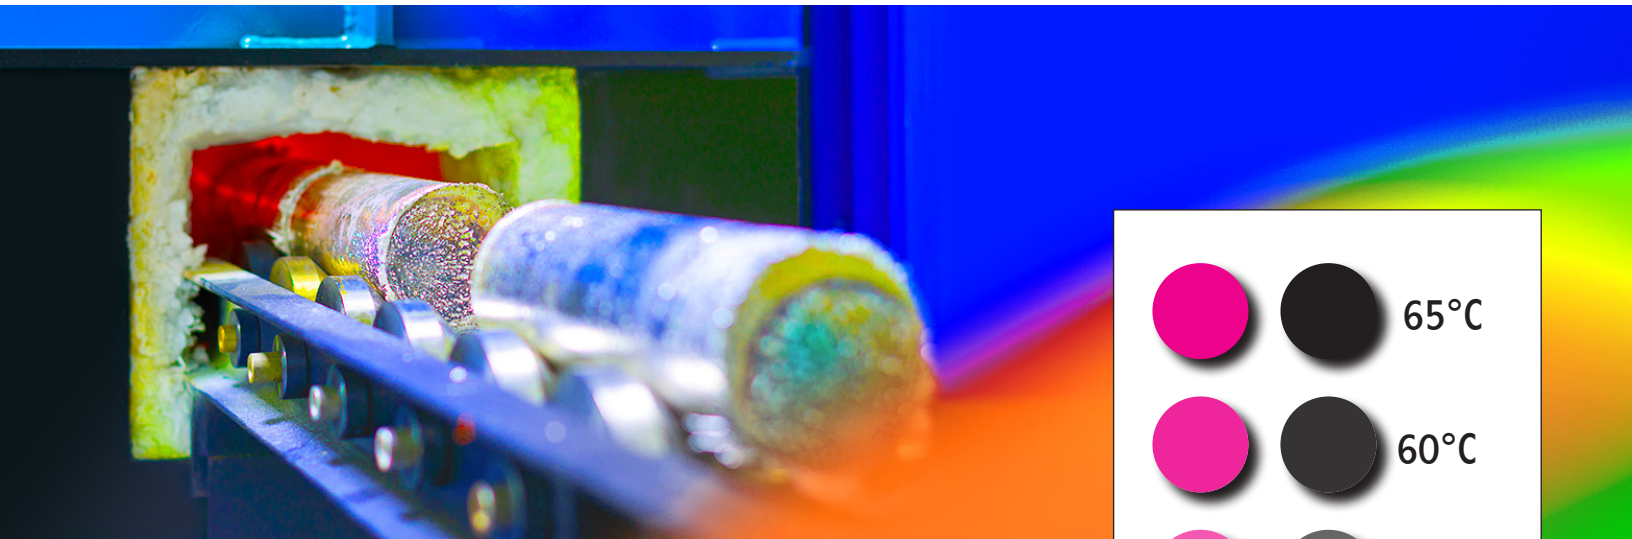

Thermochromic Pigments, Coatings and Applicators

Applications Include:

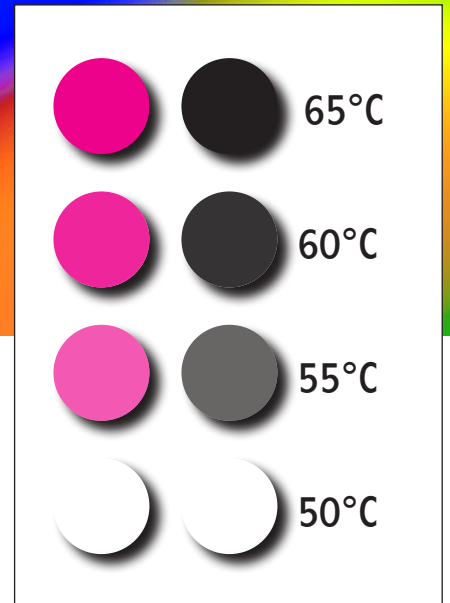

- **ALUMINUM HEAT TREATMENT & VERIFICATION**
- **High Temperature Alerts**
- **Surface Temperature Management**
- **Safety Engineering**
- **Process Control**

Highlights and Features:

- **Permanent White to Color Ink**
- **Water based Screen and Flexo Ink/Pigment**
- **Gradual Color-Change 60°C - 200°C**
- **Temperature Range: 60°C - 200°C**
- **Best on White Background**
- **Two Standard Colors:**
 - White to Magenta**
 - White to Black**
- **Call for Custom Color/Temperature**

As Temperature
Increases, Color
Density Increases

Based on K60°C-NH-WB
